Provide a Placement!

Are you looking for someone to join your business and provide you with valuable support?

Want to give the next generation an amazing opportunity?

The CAW Traineeship Programme could be just what you need!

Help a young person to get their career started today!

What is a Traineeship?

A traineeship is a work experience programme that prepares someone for employment. The programme lasts 10 weeks and consists of three elements:

- Work preparation training
- Work experience
- Maths & English

Who will be my trainee?

Your trainee will be aged 16- 24 and be looking to gain valuable work experience. They will have already been screened by us and be keen for a chance to begin their career. You will also have the chance to interview the trainees yourself.

What's in it for me?

It is a great value way to trial an individual and assess their suitability for future employment. They can bring new enthusiasm and traineeships even provide current staff with the chance to improve their mentoring skills!

What is expected of me?

There are no costs involved as the placement is unpaid. Supporting a trainee is a rewarding experience, you just need to be supportive and provide them with the chance to gain industry insight.
